June 1947

1. The largest Soviet plant for the production of radio technical equipment of all kinds is located at Sverdlovsk. The present program of work corresponds closely to the war-time program of Telefunken, particularly in the field of communications apparatus for the Air Force.
2. Dr. Steimel and Spiegel, the valve specialists, are associated with the planning of the production program for Sverdlovsk. This is being done from Moscow.
3. As far as is known, the remainder of Dr. Steimel's group, including Grimm, Hagen, Buschbeck, and Dr. Roosenstein, are in Sverdlovsk.
4. Machines for the Sverdlovsk plant were taken from the German factories of Telefunken and Opta of Leipzig (formerly Loewe), and Siemens.

Late May 1947

25X1B 5.

61,000 German workers were moved to the USSR during the last fortnight of May 1947. Large numbers were from the works of Junkers, Dessau, G. Polysius, Dessau, Schaeffer and Budenberg, Magdeburg, and Polte, Magdeburg. Workers from these drafts were on their way to Moscow, Leningrad, Saratov, and Chelnietsk (Urals).
